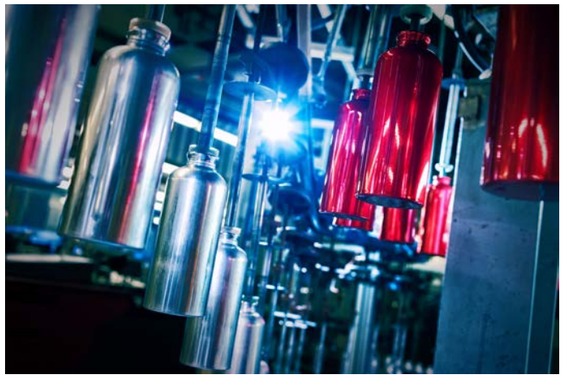
MADE WITH PASSION IN SWITZERLAND AND CERTIFIED CARBON NEUTRAL

SIGG not only stands for quality and perfection, but also for environmental awareness. Since the beginning of the company's history, the founders of the Swiss aluminium goods factory SIGG have been interested in using excess material from production and thus using resources sparingly: the SIGG bottle was born – its production and design unchanged ever since.

It all starts with a piece of aluminium that's the shape of an ice hockey puck. Every puck is extruded by a 600-ton piston stroke and then flows along the piston, transforming it into a cylinder. The cylinder gets shaped into a bottle with the help of up to 26 differently shaped modules, each one moving the metal further towards the final shape. Once the bottle has the iconic form that we all know, the next step is to coat the inside of the bottle with our liner to avoid direct contact between the liquids and the aluminium.

Once the shape and the inside of the bottle are ready, we paint the outside with the desired colour and design using the screen-printing method. The lid is added, and a manual quality check ensures that all bottles leaving the production line are in perfect condition.



VALUES IN EVERY SIGG

SWISSNESS

SIGG has a proud Swiss heritage spanning over 100 years. From its founding in 1908 to its position today as a leading global company for drinking bottles, SIGG has always kept Swiss values at its core.

QUALITY & PRECISION

All SIGG bottles are high-quality products made with strong dedication to precision and great attention to detail.

INNOVATION

Each year SIGG launches a new range of products featuring plenty of functionality and new materials.

DESIGN

SIGG's iconic design is internationally renowned and has won various design awards. It has been given a permanent place in New York's Museum of Modern Art (MoMa).

SUSTAINABILITY

SIGG products are reusable, easy to clean and recyclable. Raw materials used by SIGG are free of BPA, phthalates and other harmful substances. SIGG produces bottles in Switzerland with the overarching goal of keeping its environmental impact as low as possible. Thanks to innovative solutions, it has been able to reduce its ecological footprint further and further. SIGG currently uses more than 55 percent energy from renewable sources in its bottle production. The small amount of waste from production is recycled at a rate of 99 percent, and the water used to clean the bottles is collected in a closed system and recycled. Thanks to the longevity of its high-quality and reusable aluminium bottles, SIGG products have a significantly better CO^2 balance than disposable PET bottles.

PRINTING

Our commitment to outstanding quality extends beyond the manufacturing of our bottles, it includes the printing process as well. SIGG has been using the screen printing method for years. It delivers strikingly clear print colours with lasting brightness. We can print your bottle with up to six colours. The result: an outstanding advertising medium for your brand.

INDIVIDUAL PRINTING
starting from 100 pieces

SEQUENCE OF PRINT COLOURS ON A 6-COLOUR BOTTLE:

1. Light Blue
2. Blue
3. Green
4. Light Green
5. Red
6. Black

ENGRAVING

Custom engraving is a high-quality way to decorate SIGG products discreetly for your brand. Various possibilities are available for different products. Individual engravings on the bottle body or elegantly and finely on the lid.

TRAVELLER MyPlanet

There is no planet B, but there is the Traveller MyPlanet. The iconic Traveller bottle went down in history; the Traveller MyPlanet is shaping the future. A revival thanks to recycling. 100 percent of the aluminum is recycled and the top is based on renewable materials. Developed and produced in Switzerland and now carbon-neutral.

ABOUT OUR BOTTLE

NATURAL CONVENIENCE

Top based on renewable raw material such as celullose

Contributing to the reduction of the use of fossile material

Easy to transport - can be conveniently carried with one finger only

LEAK PROOF

Safe transportation in bag or backpack

No leaking - both in horizontal and upside-down position

Leak-proof even with carbonated beverages

Climate neutral
Product
ClimatePartner.com/16317-2105-1001

OFFSETTING CARBON FOOTPRINT

Already after the 5th use bottles made of recycled aluminum have a better CO_2 balance than PET bottles*

By buying one SIGG bottle you save 1500** PET bottles

Our Traveller MyPlanet bottle is carbon neutral***

* Calculated for an 'average product

** Calculation based on the assumption that the Traveller MyPlanet water bottle is used on average 3 times a week and remains in use for 10 years

*** Offsetting all unavoidable CO_2 emissions from the Traveller MyPlanet Bottle by supporting climate action projects. As a result of this, the Traveller MyPlanet drinking bottle is certified carbon neutral

SAFE AND SUSTAINABLE

100% recycled post-consumer material was used in the production of this aluminium bottle body

Free from BPA and harmful chemicals, such as oestrogen-mimicking substances and phthalates

Use and re-use for many years

Aluminium has excellent recycling properties and can be recycled practically indefinitely without any loss of quality

Perfect alternative to single-use plastic bottles

SWISS MADE

More than 110 years of expert craftmanship

Produced in Switzerland

Swiss Design and Engineering

Extreme resilience – light, robust and durable - this results in an excellent weight-to-strength ratio

No visible welding seams - made from a single piece of high-quality, 100% recycled aluminium

ABOUT OUR BOTTLE

Each SIGG bottle is a piece of top Swiss craftsmanship for exploring the world. For over 100 years, an achievement we wish to honour with these series. The body is made of a single piece of high-quality aluminium and is manufactured in Switzerland. It is especially light and robust. The highly elastic inner coating is resistant against fruit acids, is neutral in taste, and is free of harmful substances such as BPA and phthalates. These bottles are available in many different colours with either our proven screw top or the practical wide mouth opening.

ABOUT OUR BOTTLE

Made of aluminium and is indestructible – the classic SIGG drinking bottles are also available with a wider opening and a high-quality metal closure. This allows the SIGG bottle to be filled and cleaned more easily. The body is made of a single piece of high-quality aluminium and is manufactured in Switzerland. It is especially light and robust. The bottle even remains leak-proof with carbonated drinks. The highly elastic inner coating is resistant against fruit acids, is neutral in taste, and is free of harmful substances such as BPA and phthalates.

ABOUT OUR BOTTLE

SIGG Meridian - new, stylish and plastic-free* companion of your everyday activities. The slim drinking bottle made of double-walled 18/8 stainless steel keeps drinks hot or cold for hours and is a must-have accessory for everyone who values trendy yet sophisticated designs. The bottle is double-walled, vacuum insulated and copper plated on the inside, which guarantees an excellent insulation performance. The top is made of stainless steel and complemented by a fine bamboo application. All the materials are free from harmful substances such as estrogen-mimicking substances, phthalates and BPA. Perfect solution to impress and make a sustainable statement.

ABOUT OUR BOTTLE

The Gemstone Collection is made of double-walled stainless steel which keeps the content hot or cold for a long time. The flasks have an ultra-thin inner body made using a special spinning technology, so they weigh 30% less. Thanks to high-precision welding, the vacuum gap inside the bottle has been reduced to a minimum. This results in a smaller bottle size compared to standard bottles with identical volume.
The award-winning Hot&Cold collection in the typical SIGG look keeps drinks hot or cold for hours. Different sizes and tops offer the perfect solution for every occasion. The sizes 0.3 L and 0.5 L with the classic top and removable tea filter made of stainless steel or with the easy-to-use ONE top for 0.3 L and 0.55 L: carry, open, drink, close, all with one hand. The closure is easily split into two parts for cleaning, the drinking lip can be adapted for the left and right-handed. The sizes 0.75 L, and 1.0 L are equipped with a cup. All bottles are double-wall vacuum-insulated and made of high quality stainless steel.

ABOUT OUR MUG

Noble Pure Ceram coating, modern design and genuine drinking experience. The new Neso cup is the 'Best of all worlds'. Made of 18/8 stainless steel and coated with Pure Ceram layer on the inner and outer wall, it preserves the natural taste and smell of all hot or cold drinks. Thanks to the vacuum insulated, copper coated double wall construction you will not burn your fingers - even with very hot drinks! The insulating effect also ensures no moisture condenses on the outer wall of the cup. Additionally, the protective lid opening minimises the risk of spillage, especially while walking.

The Miracle Mug is a double-walled cup made of high-quality stainless steel with a sophisticated top. The patented drinking system makes cleaning easier. Our Mug remains hot for longer and is also leak-proof, as the liquid inside can only flow when the button is pressed. It is odourless, recyclable, and the materials used are free of harmful substances such as estrogen-mimicking substances, phthalates and BPA.
